

I am writing you to NOT pass rules to introduce a new broadcast service know as Low Power FM (LPFM). This would eliminate national or regional FM services. Hunderds of thousands of people listen every day to national or regional FM services, like KLOVE. KLOVE provides a very positive value to individuals and families. Other FM, AM and TV do not provide positive value, but rather a negative value @ times. Even if you do not believe the following statement, this is true. People who hear positive value will do positive activities; people who hear negative values will many times do negative activities. One more thing is true, what you sow is what you reap. If you have any questions, please feel free to email me. Thank you.
